TOWN OF TIVERTON
DEPARTMENT OF PUBLIC WORKS

APPLICATION FOR PERMIT AND
CONDITIONS FOR CONNECTION INTO TOWN STORM DRAIN SYSTEM

It will be permitted for the owner to connect a perimeter drain for the foundation or sump pump drain into the drainage system in the street according to the following conditions:

1.   The drain system is to be constructed according to the grades shown on the site plan that is submitted with this application.

2.   The drain system must be separated from the Individual Sewage Disposal System on this property and adjoining properties in accordance with Rhode Island Department of Environmental Management ISDS regulations.

3.   A check valve to prevent back flow from the Town drain system into the owner's drain system must be installed on private property adjacent to the property line.

4.   The connection of the owner's drain system into the Town drain system must be inspected by Tiverton Public Works Department prior to back filling. A complete mortaring or sealing of the owner's pipe into the Town system must be completed.

5.   The owner assumes all costs of materials, equipment, and labor for installation and future maintenance of the perimeter drain or sump pump drain into the Town storm drain.

6.   The owner assumes all responsibilities for the operation of the perimeter drain or sump pump drain and agrees that the Town is absolved from all liabilities associated with any failure of the Town drainage system.

7.   Only ground water and roof drain water is permitted through the owners drain system into the Town drain system. It is expressly forbidden for any type of sanitary water from sink, washing machines, toilets, etc. to be placed into the aforementioned drains.

8.   This agreement shall apply to the present owner of the property and shall remain in effect with the heirs and assigns of the property should the ownership change.
